FOSSIL POWER

NUCLEAR POWER

RENEWABLE ENERGY

Bechtel is one of the world's premier engineering, procurement, construction, and project management companies. Since its founding in 1898, Bechtel has worked on more than 22,000 projects in 140 countries on all seven continents. Today, our 44,000 employees are teamed with customers, partners, and suppliers on hundreds of projects in nearly 50 countries. To learn more, visit bechtel.com

Bechtel Power Corporation

With 65 years of experience and innovation, we are helping customers provide solutions for the 21st century—from renewable energy to cutting-edge fossil technology to the next generation of nuclear power.

We have set an unrivaled standard for performance in the power industry by building a diversified portfolio across six continents that includes more than 400 fossil-fueled plants, 150 nuclear generating units, 50 waste-to-energy projects, 50 coal gasification projects, and a number of commercial applications for renewable energy. When it comes to power projects, no one offers greater teamwork, experience, service, or dependability than Bechtel.

Communications and Transmission

- for wireline and wireless communications network deployments
- for transmission lines, substations, and distribution facilities

Fossil Power

- for solid fuel, integrated gasification combined cycle, combined cycle gas turbine, and emissions retrofit projects

Nuclear Power

- for operating plant services; plant restarts; plant completions; steam generator replacements; extended power uprates; construction and operating license applications; owner's engineer/program manager; and new generation engineering, procurement, and construction

Renewable Energy

- for solar, wind, biomass/waste-to-energy, desalination, carbon capture, and geothermal power generation
