

The Babcock & Wilcox Company (B&W) is a leading, international provider of energy products and services. Headquartered in Charlotte, N.C., and with locations around the world, B&W is a technology innovator.

Tackling tough issues such as increasing energy efficiency, clean air and global market competitiveness, B&W is dedicated to delivering long-term solutions. Whether the challenge is deploying clean coal technology or providing resources and capabilities for the nuclear renaissance, B&W is redefining the possibilities of innovation.

Through four subsidiaries, B&W is providing increased value to its stakeholders with reliable products, specialized services and enhanced opportunities with a highly skilled workforce, unmatched competencies and a commitment to making a difference where it matters most.

Babcock & Wilcox Nuclear Energy, Inc.

Products and Services: Nuclear power plant components, field inspection, life-of-plant services and heavy construction, as well as licensing and delivery of the B&W mPower™ reactor, a modular, scalable commercial nuclear reactor.

Babcock & Wilcox Power Generation Group, Inc.

Products and Services: Steam generating equipment, emissions control systems and services for existing and future fossil power plants, as well as innovative solutions for renewable energy generation.

Babcock & Wilcox Nuclear Operations Group, Inc.

Products and Services: Engineering and manufacturing of components for the U.S. government; research test reactor and national laboratory fuel; downblending and recovery operations.

Babcock & Wilcox Technical Services Group, Inc.

Products and Services: Defense, energy and environmental management, operations, technical services and medical isotope production.

With a rich heritage spanning more than 140 years, B&W recognizes its responsibility to continue its legacy of unwavering integrity and commitment to safety, security and operational excellence.
