The Bechtel difference

Bechtel delivers pipelines that transport oil, water, slurry, petroleum products, natural gas and industrial gases for the private sector. Bechtel has been building international pipelines since the 1940s, completing more than 50,000 miles (85,000 kilometers) of pipeline — enough to circle the Earth twice.

Each project delivers quality through our professional services and training – leaving a legacy in place upon project completion.

Our services include planning, engineering, procurement, construction and project management.

This is why Bechtel has been ranked #1 US contractor for the past 20 years and #1 for top 50 contractors working abroad.

Pipeline Integrity Management

Bechtel was awarded the 2018 Digital Edge 50 Award in recognition of its new Pipeline Integrity Management (PIM) tool. The tool was designed to help customers prioritize critical pipeline integrity work and improve overall pipeline safety by integrating pipeline data, geographic information systems and data science modelling to better forecast maintenance and replacement of pipeline systems.

Local content and capacity building

Bechtel works with the local community and the local supply chain to develop a capacity building program on nationally-significant projects for long-lasting impact on the industry beyond the project.

Mainline Pipe Manufacturing and Fabrication

As a partner in our own Longitudinal Submerged Arc Welding (LSAW) and spool fabrication facilities centrally located where Europe meets Asia, Bechtel Pipeline is completely vertically integrated to improve schedules and create economies of scale to deliver cost competitive certainty of outcome on your most complex EPC projects.

About Bechtel:

Bechtel is one of the most respected global engineering, construction, and project management companies. Together with our customers, we deliver landmark projects that foster long-term progress and economic growth. Since 1898, we've completed more than **25,000** extraordinary projects across **160** countries on all seven continents.
