

LNG

Corpus Christi LNG, USA

As the #1 LNG EPC contractor by installed capacity, Bechtel has the capability to help you successfully deliver a broad range of LNG projects through our integrated EPC self-perform model, strategic partnerships, and proven experience in LNG project delivery. Partnering with Bechtel means lower cost, shorter delivery schedules, and greater certainty of outcomes for our customers

Time to market means value for our customers

Our customers have successfully brought their plants into operations ahead of schedule and capitalized on early market revenue with Bechtel's integrated, direct-hire EPC model. By controlling the critical path, integrating teams, reducing interfaces, and managing project risks, we have consistently helped our customers achieve the shortest schedules in the industry.

Corpus Christi LNG, USA

Focus on innovation

In recent years, Bechtel has implemented an innovation program to stay at the forefront of the industry and invested in assets to support lower cost delivery:

- LNG Center of Excellence
- Digital Supply Chain
- Welding and Applied
- Technology Center
- Industry Control System Cyber Security Lab

Delivering certainty

Our customer's projects in Australia and on the US Gulf Coast are setting the standard for cost competitiveness in the LNG industry, delivering 70 MTPA of LNG in 7 years with the help of our EPC delivery model and innovations in execution.

Bechtel stands by its commitments to our customers and deliver as-sold

Wheatstone LNG, Australia

Building more capacity

Bechtel has supported customers executing mega-LNG projects for more than five decades and has been a partner to about one-third of all global LNG capacity. Our broad and deep technical expertise allows us to complete multiple projects concurrently, which was recently demonstrated when we helped build 15 large-scale trains across five projects concurrently.

Helping customers get closer to net zero

Wherever our customers are in their energy transformation journey—whether they're increasing access to renewable energy sources, improving energy efficiency, or decarbonizing their existing infrastructure—our specialized LNG services will deliver solutions and offer support.

We help customers achieve efficient plant operations through:

- Brownfield project execution
- Project feasibility studies
- Reliability and maintenance
- Shutdowns/turnaround planning
- Advanced simulation/operator training
- Real-time operations optimization/troubleshooting
- LNG technology specialist services
- Decarbonization and methane abatement

Technology

Bechtel is currently developing LNG projects utilizing a range of LNG liquefaction technologies:

- ConocoPhillips Optimized Cascade
- APCI
- Chart IPSMR

About Bechtel

Bechtel is a trusted engineering, construction and project management partner to industry and government. Differentiated by the quality of our people and our relentless drive to deliver the most successful outcomes, we align our capabilities to our customers' objectives to create a lasting positive impact. Since 1898, we have helped customers complete more than 25,000 projects in 160 countries on all seven continents that have created jobs, grown economies, improved the resiliency of the world's infrastructure, increased access to energy, resources, and vital services, and made the world a safer, cleaner place.

Bechtel serves the Energy; Infrastructure; Nuclear, Security & Environmental; and Mining & Metals markets. Our services span from initial planning and investment, through start-up and operations. www.bechtel.com
